EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jay M. Finkelstein on 12/02/2005.

2. The application has been amended as follows:

In the claims:

In claim 1, line 7; delete the word "said" between the words "said" and "magnetic".

In claim 9, line 7; delete the word "are" between the words "are" and "radially".

In claim 9, lines 7-8, insert the phrase —at least one permanent—between the word "said" and "magnet".

Drawings

3. The drawings filed on 09/15/2003 are acceptable by the examiner.

Specification

In the Abstract:

4. Replace the Abstract with the enclosed Abstract (see below).

Allowable Subject Matter

5. Claims 1-22 are allowed.

6. The following is an examiner's statement of reasons for allowance: Meckling (US 4,023,057) discloses (see Fig 5) permanent magnets (42 and 43) disposed radially offset from the axis of rotation for the armature 46 of a motor. However, in Meckling the magnets are used in the construction of motor stators. Prior art of record does not disclose or suggest, spraying bowl or a device for spraying coating product having a bowl comprising, among others, magnetic coupling means and complementary means, wherein the magnetic coupling means are radially offset from the complementary means, with respect to the axis of rotation of the bowl so that the magnetic coupling effort has a radial component with respect of the axis of rotation of the bowl.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yewebdar T. Tadesse whose telephone number is (571) 272-1238. The examiner can normally be reached on Monday-Friday 8:00 AM-4: 30 PM.

Art Unit: 1734

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached on (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

ABSTRACT OF THE DISCLOSURE

The bowl according to the invention is provided with magnetic elements disposed around a male part, which is adapted to be engaged in a central channel of a drive member, the magnetic elements forming outer radial flanges with respect to this male part. In the spraying device, the bowl is associated with a drive rotor, magnetic coupling means being provided which comprise magnetic bodies disposed on either side of at least one magnet borne by the rotor, while the bowl bears ribs formed in a magnetic material. The effort of magnetic coupling obtained has a radial component with respect to the axis of rotation of the bowl.
